Poor irrigation system in the country

4347. SHRI MURLIDHAR CHANDRAKANT BHANDARE: Will the Minister of WATER RESOURCES be pleased to state:

(a) whether it is a fact that World Bank has, in a recent report, held wide spread corruption with political links to be the root cause of the poor irrigation system in India;

(b) if so, what are the observations and recommendations made by the World Bank regarding the irrigation system in India; and

(c) what are the Government's reaction thereto?

THE MINISTER OF WATER RESOURCES (SHRI VIDYACHARAN SHUKLA): (a) to (c) Wes, Sir. The Irrigation Sector Review Report of the World Bank refers to modest salary levels and inadequate performance related incentives of staff blonging to State Irrigation Departments in comparison to financial gains that are possible through collusion with contractors or illicit collection of revenue from farmers in exchange for water distribution favours. Irrigation Projects are planned, formulated and executed by the State Governments and as such, the observations of the World Bank have been brought to the knowledge of the State Governments for appropriate action.
